

CPT Code Crosswalk Table

The following is Security Health Plan’s list of high-end imaging tests that require prior notification. This list is subject to change, so previously printed copies of this list may not be comprehensive. The Security Health Online provider portal at www.securityhealth.org contains a current list.

Security Health Plan considers CPT codes within the same color block to be a contiguous body part. Only one prior notification is needed for tests done within a color block.

To notify Security Health Plan that a high-end imaging test is being performed, log on to Security Health Online.
