# Preventive Drug List

## Introduction

---

In addition to a healthy lifestyle, preventive prescription drugs are important in helping people avoid many types of illnesses and complications from illnesses. This book contains a list of the most commonly prescribed preventive prescription drugs. It does not include all conditions that may be prevented with prescription drugs. The prescription drugs listed serve to maintain a person's health status and to avoid acute complications. This list is not all-inclusive and is subject to change.

The Preventive Drug List is updated annually on a calendar year basis (effective Jan. 1 of each year). Please note, this may be different than the plan year start date for some employer plans and any changes made to this list would be effective midyear for these members.

### ***Important facts about this benefit***

- Please refer to your plan documents for coverage on the selected products. Quantity limits, step therapy, prior authorizations and other coverage limitations may apply.
- Quantities are limited to a maximum 3-month supply per fill.
- Tier 3 medications listed on the Security Health Plan Formulary will not be routinely covered.
- If a generic equivalent drug is available, the originator brand drug will not be covered (Example: simvastatin is covered, ZOCOR is not).

*The covered preventive drugs are divided into categories. The listed drugs in the categories include those which are always prescribed for prevention and those which are sometimes prescribed for prevention. Drugs used for treatment of an existing condition are typically not covered under the preventive prescription drug benefit.*

**Note:** Benefits vary by plan. Please refer to your plan documents for information specific to your coverage.
