Updates to your 2027 Prescription Drug List for Medicare plans

We are updating our 2027 Medicare Prescription Drug List (PDL). When making changes, we consider a medication's overall value, which is based on factors such as effectiveness, safety, cost and the availability of alternative medications to treat the same or similar medical condition.

Prescription Drug List (PDL) update: Effective Jan. 1, 2027

- **Prior authorization (PA):** Requires your healthcare provider to provide information about why you are taking a medication before your plan can decide how it may be covered.
- **Quantity limit (QL):** The largest quantity of medication covered per copayment or in a defined period of time.
- **Step therapy (ST):** Requires you to try a less expensive or preferred medication first before progressing to a more costly or nonpreferred alternative.

Medication	Type of change	Effective date	Coverage rules or limits
Armour Thyroid	Removed from PDL	1/1/2027	N/A
Atrovent HFA	Removed from PDL	1/1/2027	N/A
Avtozma	Removed from PDL	1/1/2027	N/A
