Preventive benefits with Security Health Plan

Security Health Plan encourages preventive approaches to health care through services including health assessments and routine physical examinations. We know early detection can improve our members’—your employees’—chances of having a long and healthy life. That translates into less sick days and time off work and increased productivity.

We encourage our members to see their primary care provider (PCP) annually for a preventive care visit. One preventive care visit per year is available to your employees at no additional cost to them. During a preventive care visit, a PCP will:

- talk with your employee about their personal and family health history
- discuss their current health, lifestyle and behaviors
- perform a physical exam
- suggest other screening services your employee may need

We also handle preventive care differently than most other insurance companies. We offer no-charge preventive services whether our members have been previously diagnosed with an illness or not. With most other plans, if a member has been diagnosed with an illness, screenings are coded as “diagnostic” and are no longer preventive.

Free Security Health Plan resources to help keep your employees healthy:

- health coaches who can help your employees reach their lifestyle goals
- online health assessment
- online health coaching program
- guidebooks and other resources to help your employees adopt a healthier lifestyle by giving them steps they can take at their own pace
- wellness webinars your employees can view at their convenience

For more information on any of these resources, call us today at 1-800-472-2363 (TTY: 711)

To get started, remind your employees to choose a PCP and make an appointment for their annual preventive visit. Let your employees know they can preview providers in your plan’s network online using our Find a Doctor tool at www.securityhealth.org/directory.
How do we handle preventive care differently?

- For example, if you have an employee who has been diagnosed with high cholesterol in the past we will cover that member’s first annual bloodwork at their preventive care visit under their preventive care benefits.
- Or if one of your employees has a colonoscopy at their preventive care exam and their provider determines they need to have polyp removal, we will cover that under their preventive care benefit.

Why do we do this?

We are committed to enriching our members’ lives so they can reach their best health. Preventive care will help preserve and frequently improve your employee’s health, and in the long run that contributes to lower health care costs. Preventive care is a benefit to our members, both medically and financially.
